

Geometric Patterns Coloring Pages

25 relaxing designs for adults

STARS • TILES • MOSAICS

STARLIT PAGES

Welcome

Thank you for choosing this collection. Inside are 25 geometric designs inspired by classic star-and-polygon tile patterns. Every design is drawn as a precise vector pattern, so lines stay crisp and every shape is large enough to color.

What's inside

- Designs 1-8: Easy. Large shapes and bold lines.
- Designs 9-17: Medium. Woven bands, stars and rosettes.
- Designs 18-25: Intricate. Fine lace-like tilings for fine-tip pens and sharp pencils.

Coloring ideas

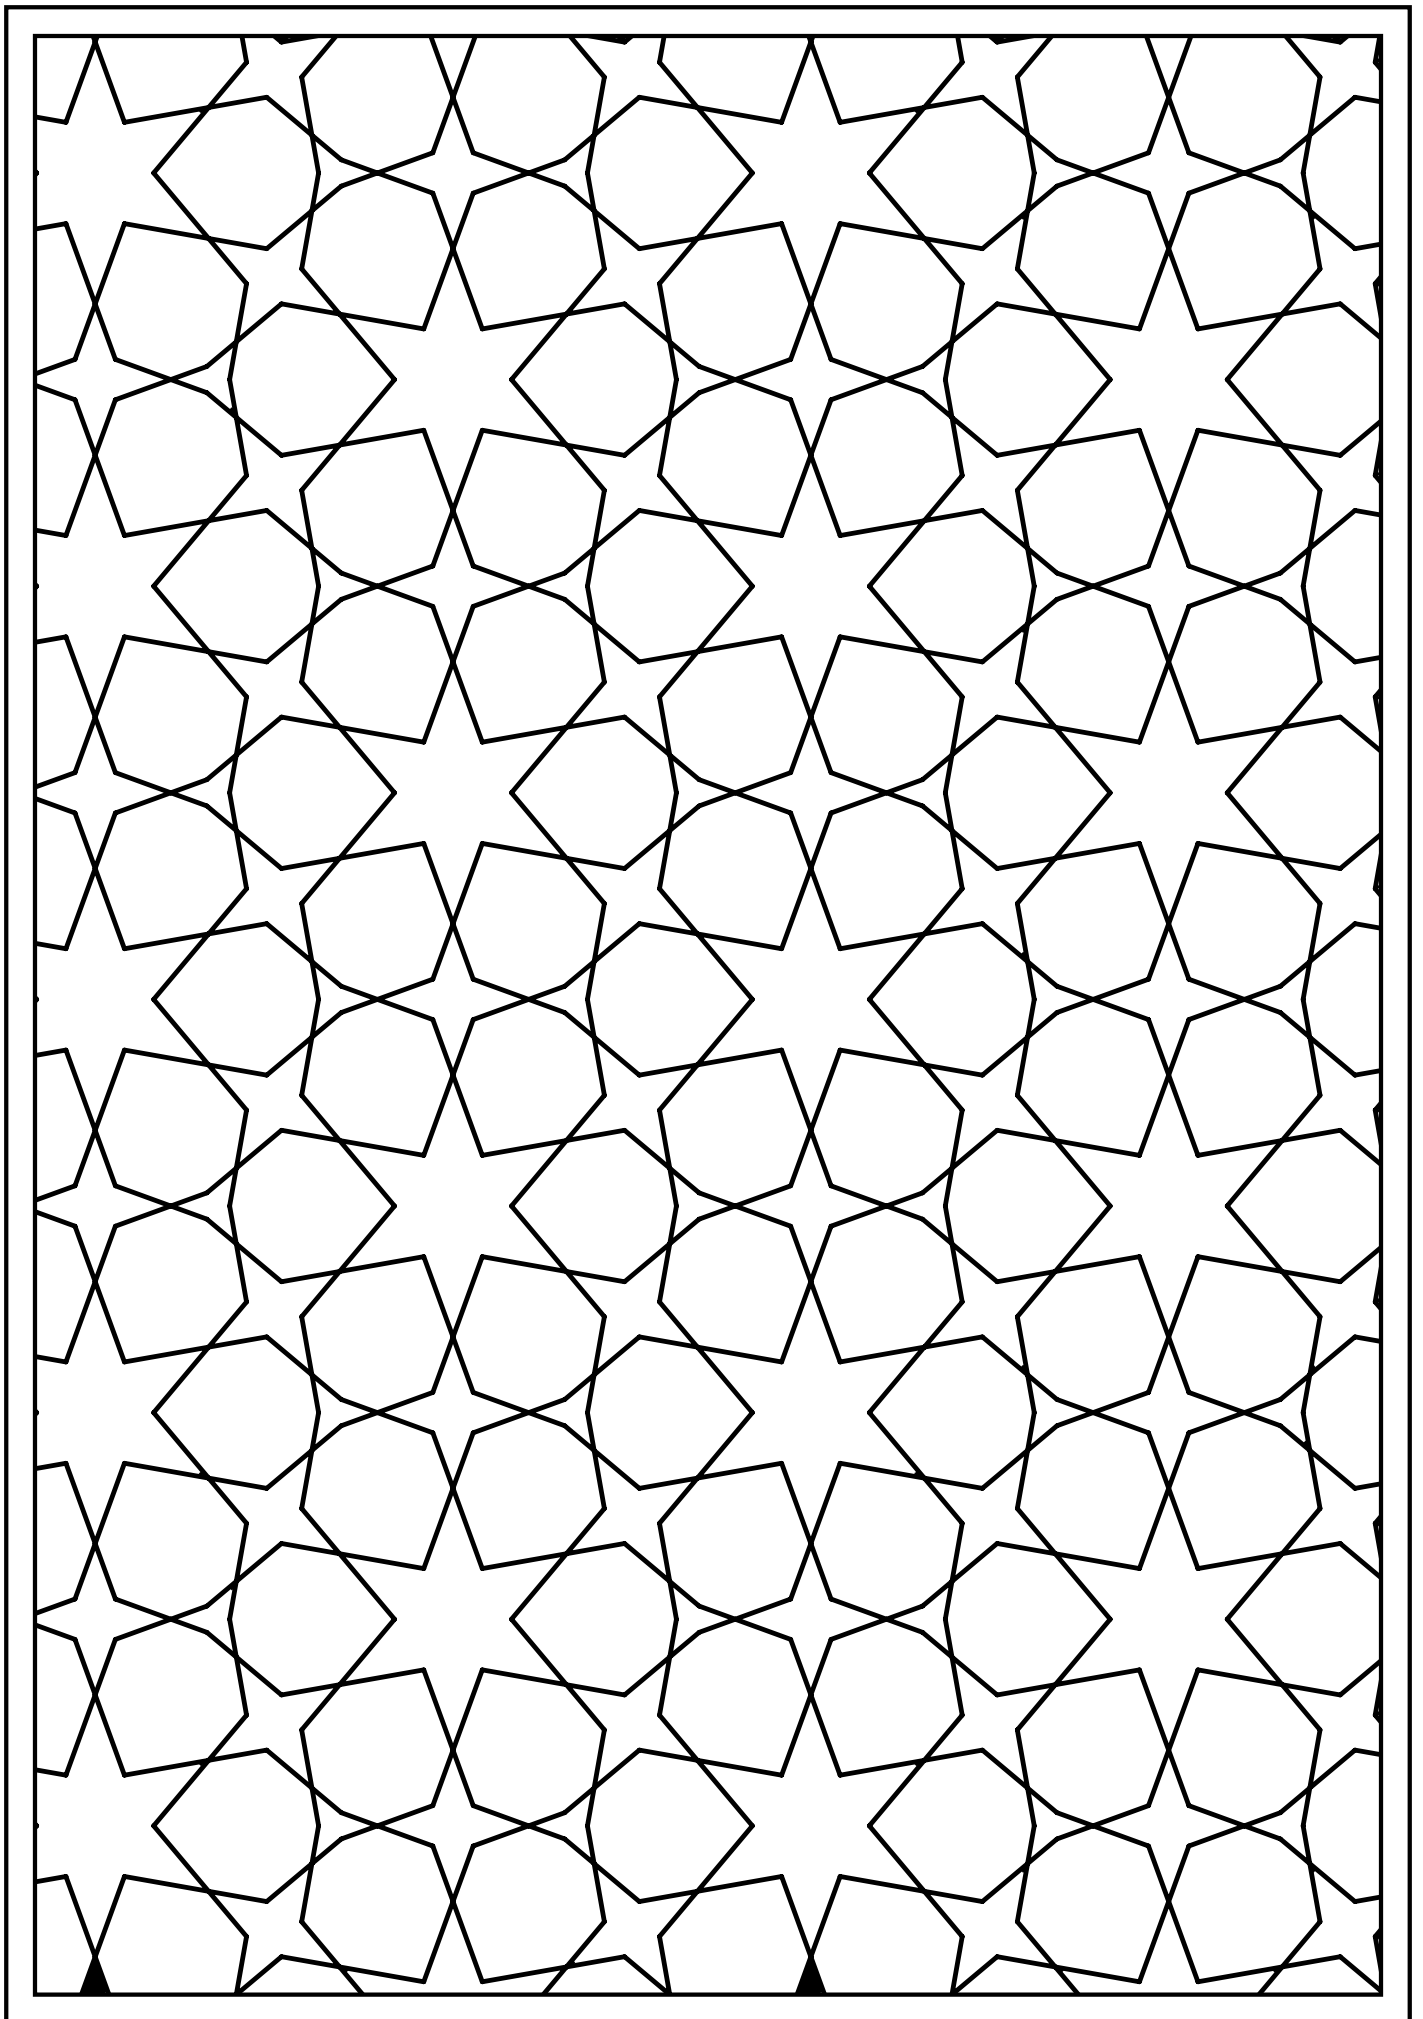

- Pick two or three colors and repeat them to bring out the stars.
- Color the woven bands one color and the shapes between them another.
- Try a light-to-dark gradient from the center of the page outward.

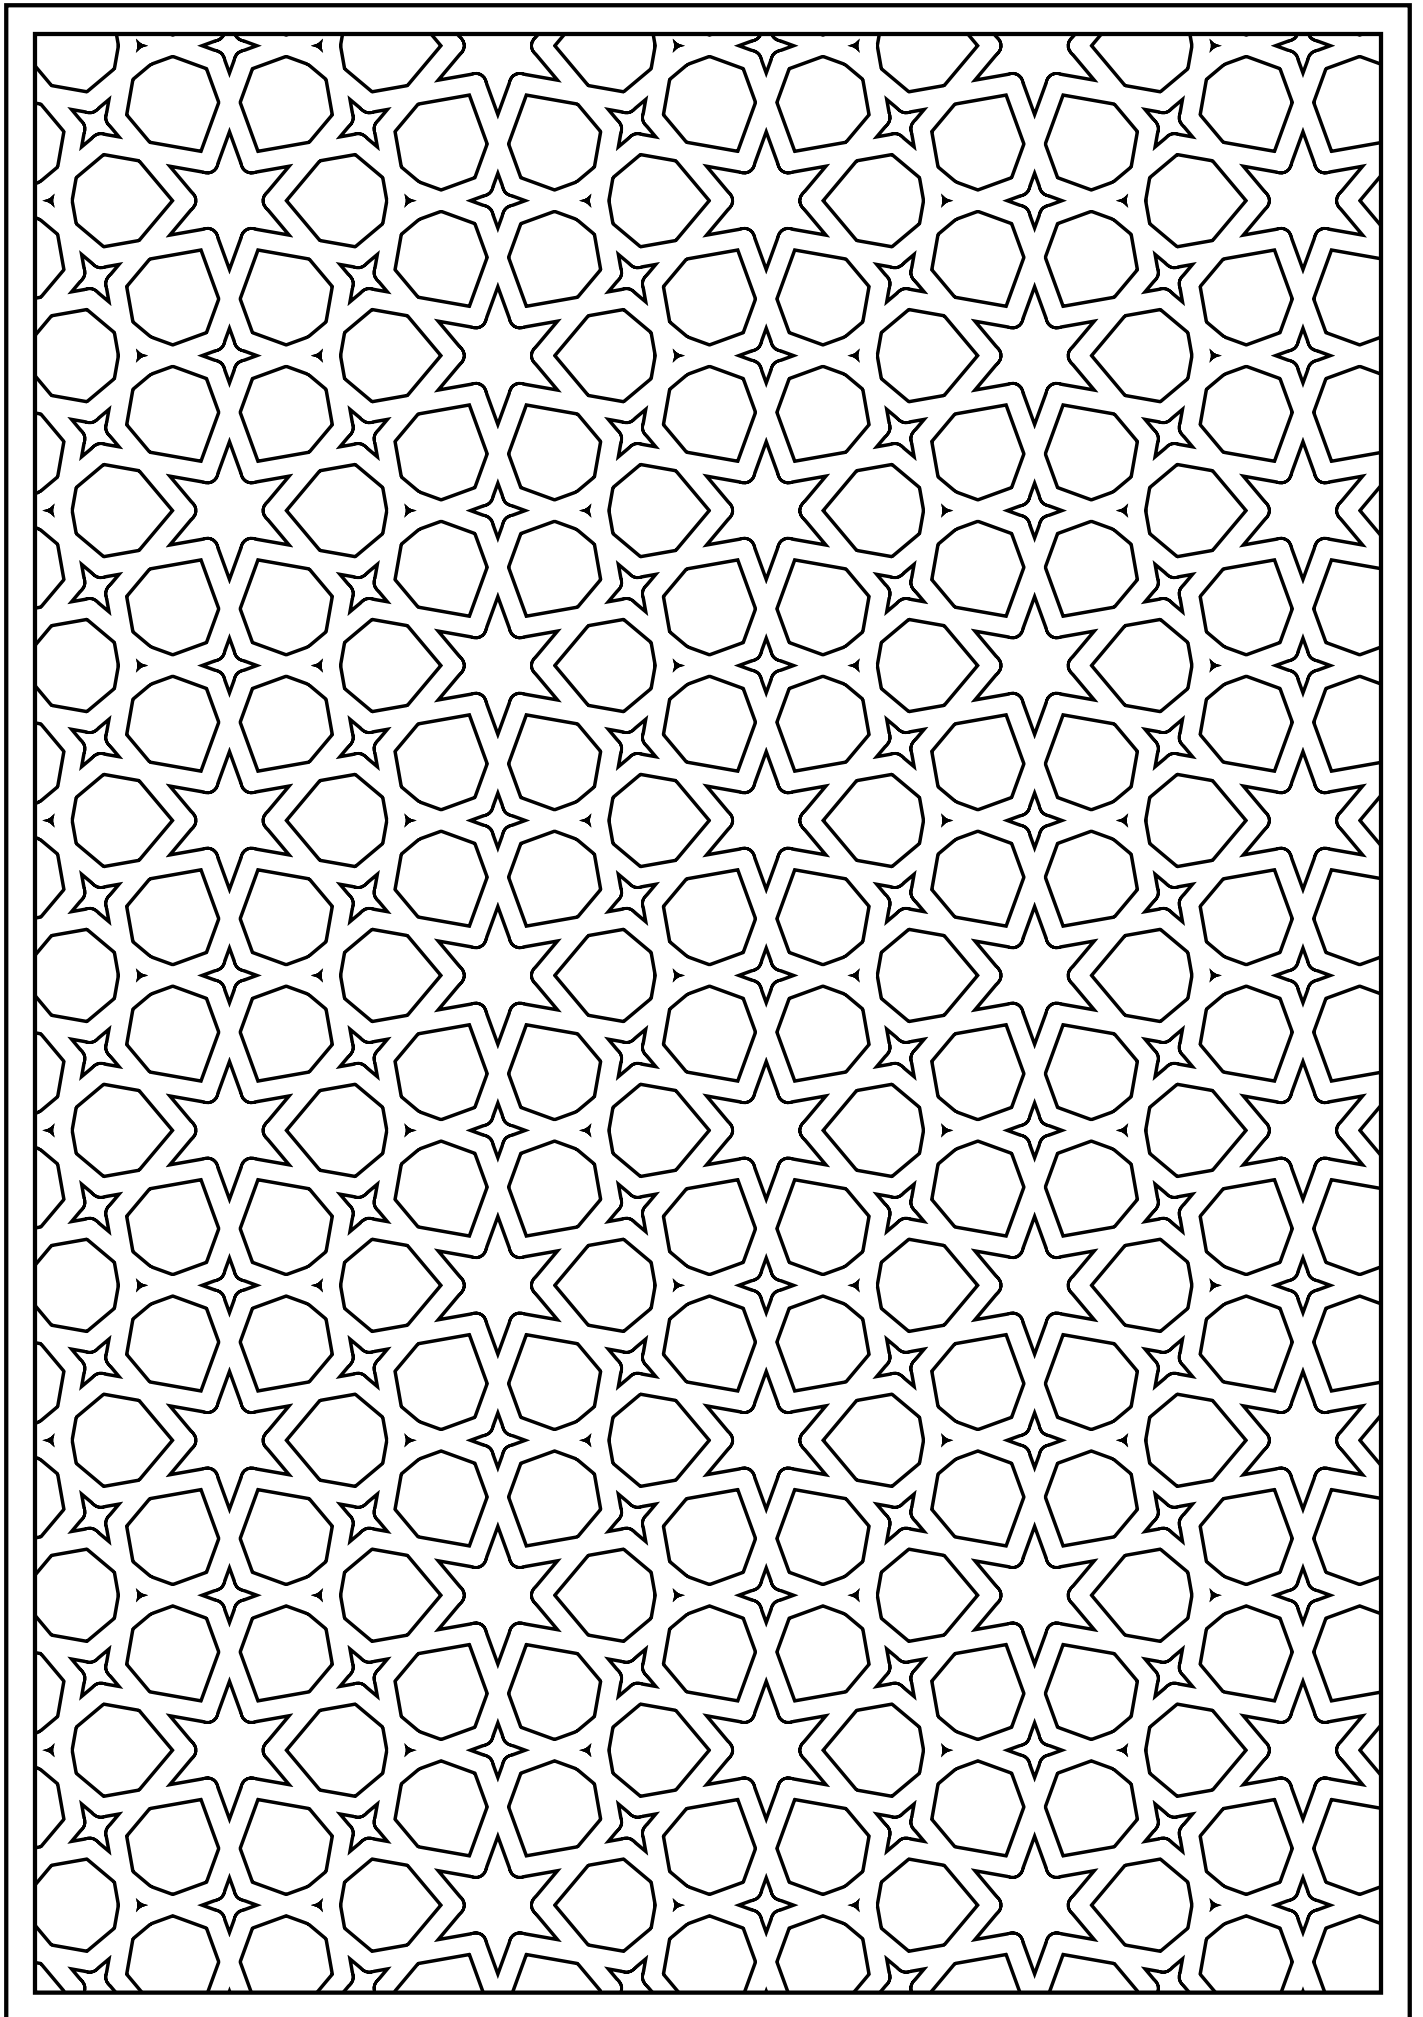

Printing tips

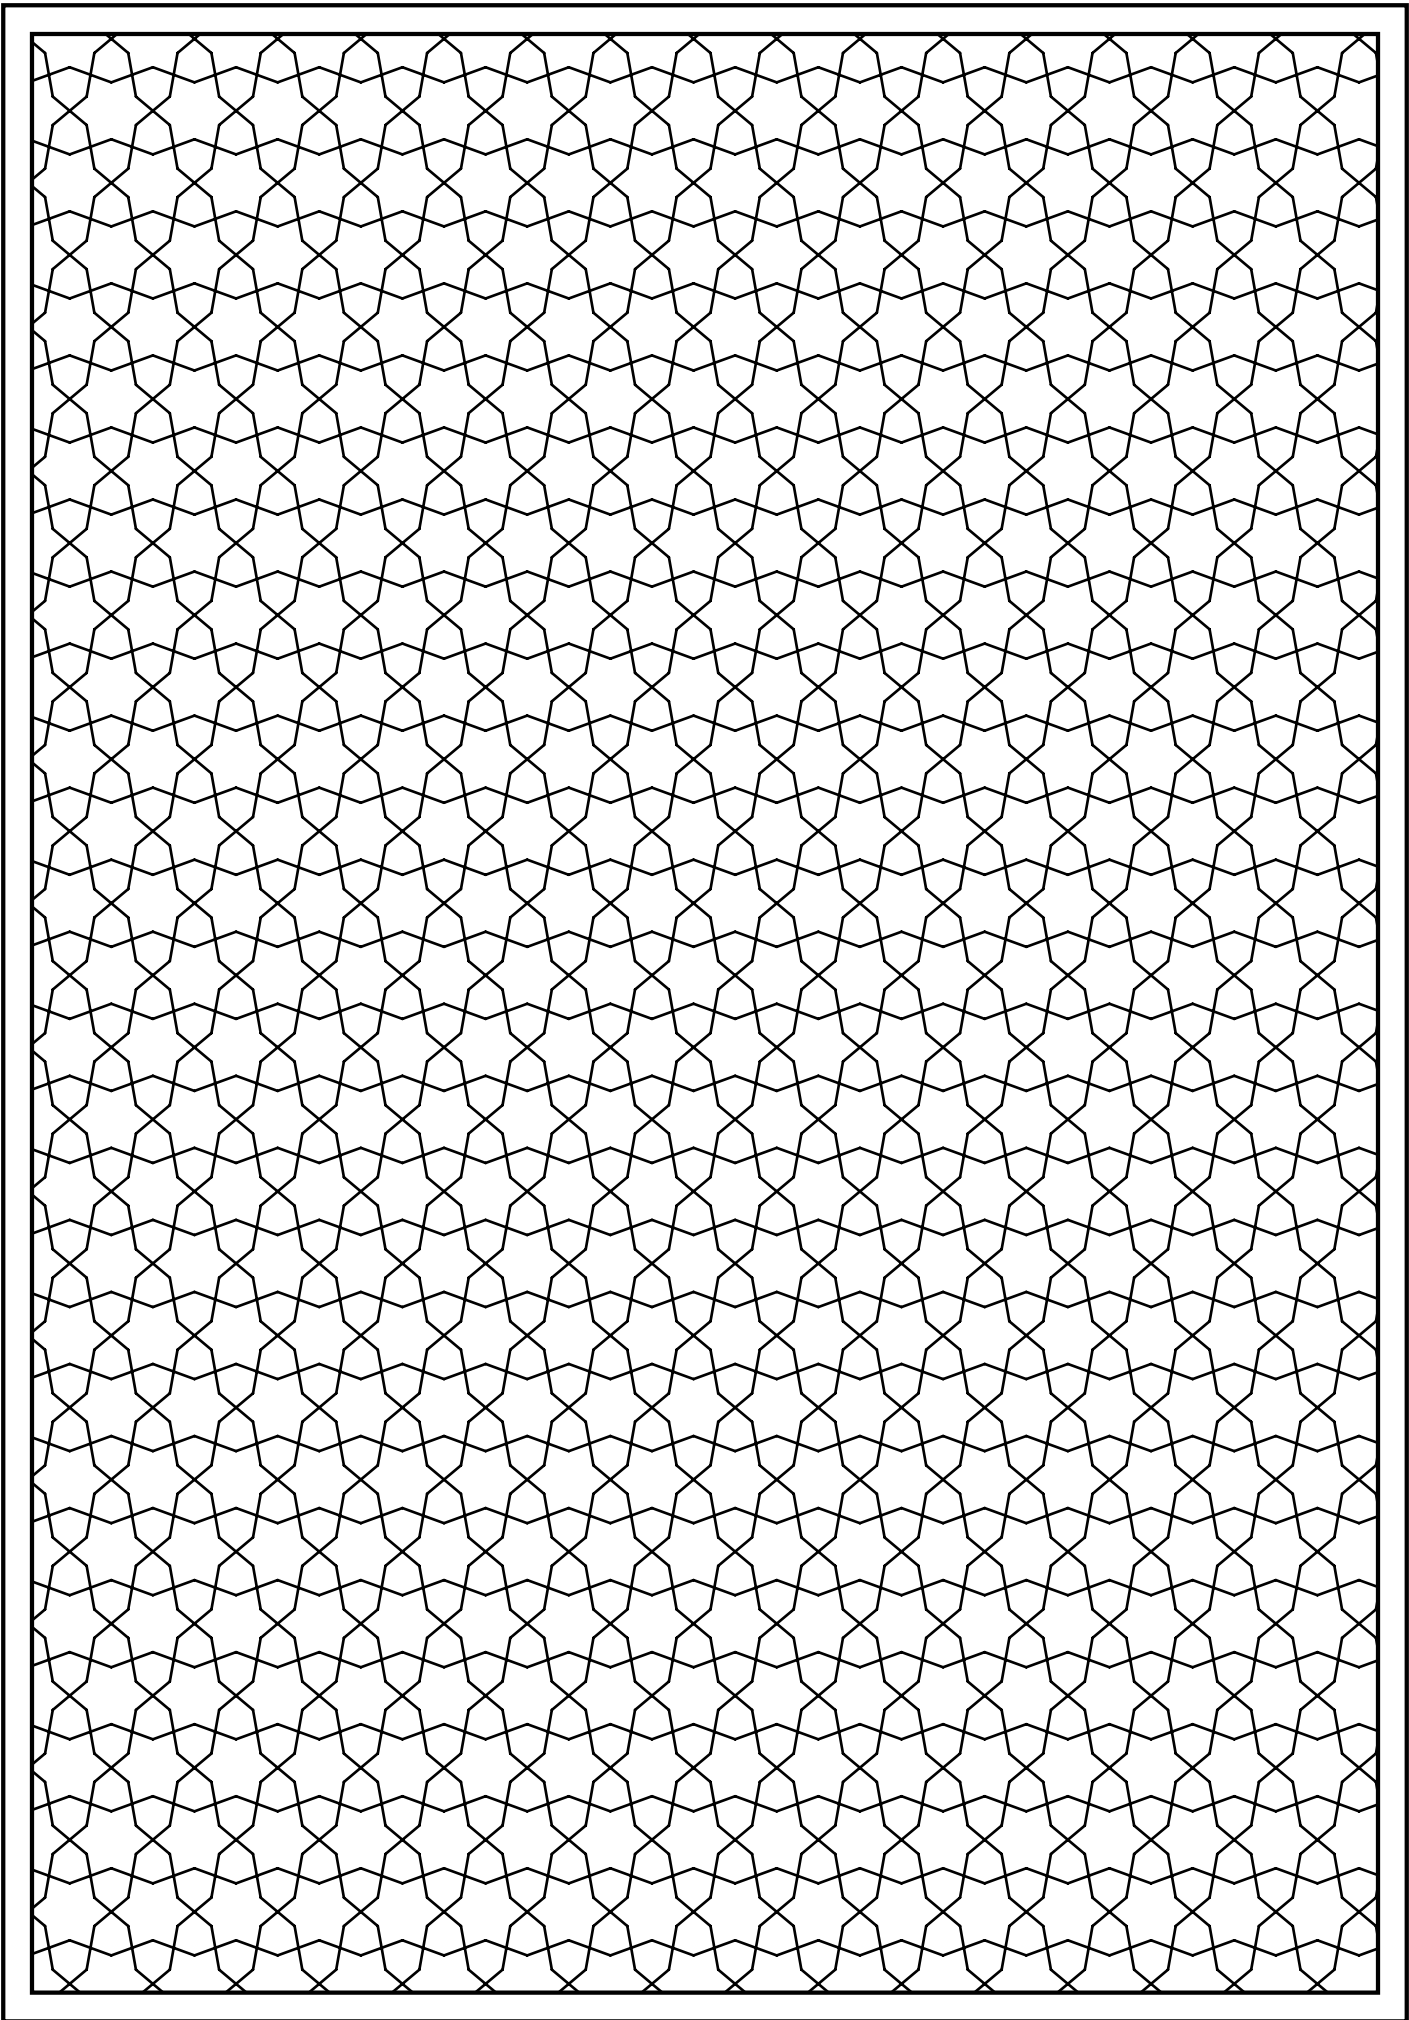

- Print at 100% or "Actual size" (not "Fit to page").
- Use heavier paper (100-120 gsm / 28-32 lb) if you color with markers, and print on one side only.
- Two versions are included: A4 and US Letter.

License

Personal use only. You may print these pages as many times as you like for yourself and your family. Please do not resell, share or redistribute the files, and do not sell printed or colored copies. Designs (c) 2026 Starlit Pages.
